

REQUEST FOR TECHNICAL PROPOSALS
ADDENDUM #1
The Retreat Sanitary Sewer Rehabilitation Project
06/04/2026

Corrections:

1. The dates stipulated in the request for technical proposals stated the Technical Proposals will be received until 2:00 pm (EST) on Friday, June 12, 2025.

This Addendum #1 corrects the date listed to **Friday, June 12, 2026**.

2. The dates stipulated in the requests for technical proposals stated that questions must be received no later than 2:00 p.m. (EST) on Tuesday, June 2, 2025.

This Addendum #1 corrects the date listed to **Tuesday, June 2, 2026**.

Clarification:

1. The RFP states that the majority of sewers in the project area have been televised, but portions have not been coded in accordance with NASSCO standards. For clarification, 90% of the sanitary sewers have been televised.

The basic scope of services presented in the RFP also states that the Preliminary Design Report shall identify locations where additional field investigation, cleaning, or supplemental CCTV inspections may be necessary. For clarification, proposed project teams may include a subconsultant CCTV firm to perform coding of existing CCTV videos. However, such firms would be ineligible to bid on the resulting improvements project so that every prospective bidder has identical information upon which to base a bid. If the Preliminary Design Report recommends additional CCTV as part of the design, the County may provide that information through our Collections Department or a County Contractor.
